

Dear Customer,

We're responding to you following your enquiry into Nigra 2002, asking for advice on its safe use.

Firstly we're pleased that you've chosen Sibelco's products in bringing your creations to life, and we hope that you enjoy the use of our clay bodies.

As with all our prepared bodies intended for use in artisan ceramics, we encourage you to adopt safe practices around the handling of Sibelco's or any other suppliers clay products. We advise you to use wet to avoid the creation of dust, and clean up residue left from the prepared clay body after use.

We advise against dry sweeping of the product, its advised to use a vacuum to capture any loose dust, or spray water on the area and wipe with a damp cloth. Where dust is unavoidable, we advise the use of dust masks to protect you when cleaning up after use.

When handling our products, we advise that you don't eat, drink or smoke while using, and for people that suffer with dermatitis or sensitive skin, we advise the use of appropriate protection on hands or exposed skin, (protective clothing, barrier creams).

We're proud of our products and always use the highest quality materials, sourced from our own dedicated mineral deposits and from reputable suppliers. Our products are manufactured to consistently high standards, making Sibelco a trusted supplier to some of the world's most prestigious tableware manufacturers. We have processes in place to monitor global trends in product regulation and standards.

I hope this reassures you in the continued use of Sibelco's clay products.

Kind Regards

Sibelco
